### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 June 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 to 26 and 35 to 38 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 to 26 and 35 to 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent 129332.

The English abstract of JP'332 discloses an ultra-low carbon steel having a composition with constituents whose wt% ranges overlap those recited by the claims; such overlap renders applicant's composition prima facie obvious despite differences in non-overlapping areas, see *In re Malagari*, 182USPQ549.

More specifically, note examples C, E, F, G and H in Table 1 of columns 9 and 10 which meet the claimed composition. Even though prior art does not teach Ca, V, Sn, or Nb as recited by one or more of the claims, such would not be a patentable difference since the lower limit of these alloying constituents is zero and therefore optional.

Art Unit: 1742

Also even though the prior art does not teach 20 or less inclusions in 60 fields under a microscope in a sample steel prepared in accordance with JIS G0555 as recited by the claims, such would not be a patentable difference since the technique of measuring is not the gist of the invention, and also the low number of 20 would be expected since similar to the present invention, the prior art desires and seeks to have extremely low numbers of inclusion in order to reduce surface defects, such as pin holes and press cracks. See the English abstract of JP'332 which teaches the defects present in the steel sheet are decreased by reducing the number of inclusions in a cast piece, in particular the number of an alumina cluster inclusion is less than 20/kg. In any event, the differences between the prior art and present invention would amount to no more than routine optimization of non-metallic inclusions which is well within the skill of the art and productive of no new and unexpected results.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
